

REMARKS CATEGORY B

We have received a number of reactions concerning the publication of the compositions received for category B. The jury has been informed in time about these by the contact person of the composition contest. The list given below summarizes most of the remarks received, however, leaving out some (subjective) observations. In addition, the jury also did its own research (of course!), but their findings will be kept confidential for the moment. We thank everyone for the effort and time for sending their reactions!
